Investment objective

The fund aims to provide capital growth in excess of the MSCI AC World (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of companies worldwide which meet the investment manager's sustainability criteria.

The fund is actively managed and invests at least two thirds of its assets in equities of companies worldwide that meet the investment manager's sustainability criteria and which also focus on a range of equity factors (also commonly known as investment styles). Companies will be simultaneously assessed on these equity factors using a fully integrated systematic, bottom-up investment approach.

Relevant equity factors may include the following: - Low volatility – involves evaluating indicators such as share price movement and historical performance to determine those securities that the investment manager believes will experience smaller price movements than the global equity markets on average. - Momentum – involves evaluating trends in stocks, sectors or countries within the relevant equity market. - Quality – involves evaluating indicators such as a company's profitability, stability and financial strength. - Value – involves evaluating indicators such as cash flows, dividends and earnings to identify securities that the investment manager believes have been undervalued by the market. - Small cap – involves investing in small sized companies being companies that, at the time of purchase, are considered to be in the bottom 30% by market capitalisation of the global equity market and exhibit attractive characteristics based on the styles described above. - Sustainability – involves evaluating challenges and opportunities companies face from social, environmental and governance considerations.

The fund follows a systematic approach, which scores all companies in a broad universe, including the MSCI AC World (Net TR) index, against the above equity factors to create a broadly diversified portfolio.

The systematic process seeks to maximise the fund's expected exposure to the aggregated score against the equity factors, subject to consideration of active risk and transaction costs, while applying additional controls to manage concentration risk across securities, sectors and industries, and unexpected bias towards or away from the benchmark. The investment manager reviews the systematic output on a regular basis and adjusts to ensure that the desired risk characteristics have been delivered and that the portfolio is appropriate against the equity factors.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus).

The fund maintains i) a higher overall sustainability score; and ii) at least a 50% lower carbon intensity score, relative to the MSCI AC World (Net TR) index, based on the investment manager's rating system.

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the fund's webpage <https://www.schroders.com/en/lu/private-investor/gfc>

The fund invests in companies that have good governance practices, as determined by the investment manager's rating criteria.

The fund may invest in companies that the investment manager believes will improve their sustainability practices within a reasonable timeframe, typically up to two years. The investment manager may also engage with companies held by the fund to challenge identified areas of weakness on sustainability issues. More details on the investment manager's approach to sustainability are available in the prospectus and on the webpage <https://www.schroders.com/en/lu/private-investor/strategiccapabilities/sustainability/disclosures>

Benchmark: The fund's performance should be assessed against its target benchmark being to exceed the MSCI AC World (Net TR) Index. The fund's investment universe is expected to overlap materially with the components of the target benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) Please see appendix III of the fund's prospectus for further details.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depositary: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 3 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Performance Scenarios

Recommended holding period:		3 years	
Example Investment:		EUR 10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 2580	EUR 3400
	Average return each year	-74.2%	-30.2%
Unfavourable	What you might get back after costs	EUR 8410	EUR 8880
	Average return each year	-15.9%	-3.9%

Favourable	What you might get back after costs	EUR 14290	EUR 17090
	Average return each year	42.9%	19.6%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Be aware of currency risk. If you choose a foreign currency share class you will be exposed to currency risk and your final return will depend on the exchange rate between the foreign currency and your local currency. The risk is not considered in the indicator shown above.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The Unfavourable scenario was simulated based on the appropriate benchmark used for an investment between 12 2021 to 04 2023

The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 09 2014 to 09 2017

The Favourable scenario occurred for an investment between 12 2018 to 12 2021

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 161	EUR 373
Annual cost impact (*)	1.6%	1.0% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10,2 % before costs and 9,2 % after costs.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
